DENIEL DATUR

Gubat, Sorsogon, Philippines | 09633254997 | daturdeniel@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science graduate with local government IT experience and hands-on work in full-stack web development, database-backed systems, Android apps, and AI integration. Built and deployed a public-facing service-request system and currently developing AI-assisted education tools. Skilled in PHP, JavaScript, SQL, Python, and technical troubleshooting.

TECHNICAL SKILLS

- **IT Support**: PC Hardware Assembly, Troubleshooting, Printing, Data Encoding, Basic Networking
- **Web & Backend**: PHP (PDO), HTML5, CSS3, JavaScript, MySQL, SQLite, API Integration, Sessions, CSRF Security, React.js, Node.js, FastAPI, PostgreSQL, Supabase
- **AI & Development Tools**: Python, LLM API Integration, Online/Local AI Models, Git/GitHub, Google Colab, Jupyter Notebook, MS Office
- **Mobile Development**: Android Studio, Java, CameraX, MediaPipe, TensorFlow Lite
- **Machine Learning**: TensorFlow, Scikit-learn, Model Training, Classification, Model Evaluation
- **Deployment & DevOps**: AWS EC2 and S3, CI/CD

EXPERIENCE

Gubat Water District — Jan 2026 - May 2026

Trainee

- Completed 500+ hours of on-the-job training with the IT/administrative team of a local government water utility.
- Developed the GWD Service Request Management System, a web portal (see Projects below).
- Configured and deployed the system on an Apache server with .htaccess rules for secure public access, under the office IT lead's guidance.
- Provided IT support covering PC hardware, troubleshooting, printing, and data encoding.

PROJECTS

GWD Service Request Management System — 2026

- In Active Use
- Built and deployed a public customer portal for submitting service requests, generating 8-character tracking codes, requesting new water connections, and uploading photo/video evidence.
- Developed an admin dashboard to review, approve, and process requests.
- Implemented the PHP/PDO backend with SQLite database storage using WAL mode, session management, and CSRF protection.
- Built the HTML5, CSS3, and JavaScript frontend with Canvas API image compression and WebRTC video capture.

Basic Training Guide for Hand Sign to Text (SignBridge) — 2025 - 2026

- Developed an offline Android computer vision app for A–Z hand-sign recognition using MediaPipe, CameraX, and a TensorFlow Lite MLP; reported 99.52% test accuracy across 28 gesture classes. Presented with a two-person team.
- GitHub: github.com/DaturD/ASL-Hand-Sign-App and github.com/DaturD/ASL-Hand-Sign-Training

EduSync AI - AI-Powered Learning Management System — 2026 - Present

- IN PROGRESS
- Developing a full-stack learning management system using PHP, JavaScript, and MySQL, with modules for class management, student enrollment, attendance tracking, assessments, and digital learning resources.
- Integrating AI/LLM APIs for AI-assisted lesson planning, including saved drafts, generation-status tracking, curriculum-based content, and lesson plans formatted to official templates.
- Implementing grade management and DepEd E-Class Record workflows, including Excel gradebook import/export while preserving existing formulas, worksheet layouts, and formatting.
- Building backend logic, database operations, API endpoints, and responsive user interfaces; troubleshooting data persistence, AI generation workflows, document processing, and cross-module integration.

EDUCATION

CCDI Sorsogon — 2022 - 2026

Bachelor of Science, Computer Science

CERTIFICATIONS

Python: Kaggle
- Certificates of Completion

Intro to Programming: Kaggle
- Certificates of Completion

Intro to Machine Learning: Kaggle
- Certificates of Completion
